(54) MOLDING MOLD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a molding mold which enables easy exchange of an insert in case of changing a position of an aperture and the like of a molded item.

SOLUTION: A molding mold comprises a fixed mold 20 and a movable mold 30, each having attaching members 34 and 35 to a molding machine 60 respectively, where

the molding mold is equipped with insert members 46 and 47 exchangeable from the attaching surface side to the molding machine of the attaching member of at least one of the fixed mold and the movable mold. The insert members 46 and 47 can be, for example, easily exchanged from the side of the outer surface 45a of the attaching member 45 of the movable mold.
